

Vaibhav Kumar

Hyderabad, India / Open to Relocation | +91-7004931269 | vaibhavkkr24@gmail.com | linkedin.com/in/vaibhavsahkk | github.com/Vaibhavsahkk

PROFESSIONAL SUMMARY

M.Sc. Computer Science graduate (2026) with comprehensive background in **Data Operations, Machine Learning Pipelines, and Analytics**. Dual **Oracle Cloud Certified** in Data Science & Generative AI. Experienced in building automated data extraction routines, SQL query optimization across 100,000+ records, and audit workflows for machine learning models. Direct research intern experience in large-scale dataset benchmarking. Based in Hyderabad.

EDUCATION & LEADERSHIP

Central University of Rajasthan <i>Integrated M.Sc. in Computer Science (Machine Learning & Systems Focus)</i> Student Council Member <i>Central University of Rajasthan (Elected Council Member, Campus Analytics & Event Operations)</i>	2021 – 2026 Ajmer, Rajasthan Jul 2024 – Jul 2025 Ajmer, Rajasthan
---	--

TECHNICAL SKILLS

Data Operations & Querying: SQL (PostgreSQL, MySQL, Complex Queries, Transformations), Python (Pandas, NumPy, Scikit-learn)
ML Pipeline & Annotation Ops: Data Ingestion, Data Quality Assurance, Label Validation, Anomaly Detection, EDA
Analytics & Visualization: Power BI (DAX Measures), Tableau, Matplotlib, Seaborn, Automated Reporting
Cloud & Platforms: Oracle Cloud Infrastructure (Dual OCI Certified), AWS Concepts (S3, EC2), Git, Linux, Docker

WORK EXPERIENCE

Data Science Intern <i>Celebal Technologies</i> • Engineered automated data processing pipelines and optimized SQL queries across 100,000+ transactional records. • Built automated analytical reports using Pandas, Matplotlib, and Seaborn; performed exploratory feature analysis and model evaluation.	Jun 2025 – Aug 2025 Remote, India
Research Intern – Systems Modeling <i>University of Hyderabad</i> • Designed and benchmarked statistical modeling and machine learning pipelines across large-scale datasets (68,000+ records). • Implemented data validation routines, anomaly detection filters, and regression analysis, eliminating manual preprocessing overhead.	Jan 2026 – May 2026 Hyderabad, India

KEY TECHNICAL PROJECTS

Automated Data Ingestion & Quality Validation Pipeline  <i>Tech Stack: Python, SQL, Automated Schema Validation, Data Quality Metrics, SQLite</i> • Engineered automated data pipeline ingesting and validating operational datasets, ensuring 100% schema compliance and audit traceability. • Implemented automated anomaly detection filters flagging corrupted or outlier records prior to downstream model ingestion.	Data Ops
Predictive Operations Demand & Quality Analytics  <i>Tech Stack: Python, XGBoost, Feature Engineering, Tableau Dashboards, Statistics</i> • Developed predictive operational analytics model reaching 90.9% validation accuracy, uncovering root causes of throughput bottlenecks. • Built comprehensive dashboards communicating KPI trends, annotation cycle times, and operational SLA tracking to leadership.	Analytics / BI

CERTIFICATIONS

- **Oracle Cloud Infrastructure 2025 Generative AI Certified Professional** (Oracle Cloud, Valid to 2027)
- **Oracle Cloud Infrastructure 2025 Data Science Professional** (Oracle Cloud, Valid to 2027)
- **McKinsey Forward Program – Problem Solving & Business Analytics** (McKinsey & Company, 2024)
